BROWN PELICAN DIE-OFF

ERNEST H. WILLIAMS, JR. AND LUCY BUNKLEY-WILLIAMS

Department of Marine Sciences
University of Puerto Rico
Mayagüez, Puerto Rico 00709

A number of Brown Pelicans (*Pelicanus occidentalis*) died in Puerto Rico and the U.S. Virgin Islands in February and March 1989. The Caribbean Aquatic Animal Health Project, Department of Marine Sciences, University of Puerto Rico, Mayagüez, Puerto Rico 00709-5000, is attempting to follow this mortality. Dr. Ernest H. Williams, Jr., of the Caribbean Aquatic Animal Health Project, would greatly appreciate receiving information about deaths of this animal in Puerto Rico, the U.S. Virgin islands, the Caribbean, or in other adjacent areas during this time. The Project is supported by the Department of Natural Resources of the Commonwealth of Puerto Rico and by the University of Puerto Rico.
